

MATERIAL DESCRIPTION

MATERIAL

Sheet vinyl system engineered with a high-density, closed cell sport backing.

ATTRIBUTES

Slightly textured embossed surface with a printed wood design that resembles wood strip flooring in size, color and grain appearance. Solid color options are homogeneous in color. Manufactured with a nano UV treatment and factory laminated.

MATERIAL APPLICATIONS

Grid Vinyl's performance characteristics are highlighted in indoor fitness facilities. Other uses include cardio and group exercise studios, walkways, basketball/volleyball courts, Pickelball courts, etc.

MATERIAL WARRANTY

GRID warrants the material, free of manufacturing defects and when installed using its recommended procedures and adhesives, under normal use for a period of 15 years from the date of its original installation. Please refer to GRID Vinyl's warranty for full details.

FEATURES

- Dense and resilient
