

PRODUCT COMPARISON

BENCHES

Grid Benches are the final piece to complete your locker room. They are offered in two finish options; Ultramat Laminate + Solid Surface. Both options provide an antibacterial, scratch-resistant surface that is designed to withstand the intense demands of a modern locker room.

Our bench tops are paired with two or three square aluminum legs [depending on length] that are engineered to either be freely placed in the locker room or secured into the floor for a more permanent solution.

ADA compliant benches are available upon request
